REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor render obvious all the cumulative limitations of claim 23 with particular attention to the working electrode including a mixed ion/electron conductor constructed from a ceria solid solution doped with at least one mixed valency element. The closest prior art to this limitation is GB '666 which taught the use of a mixture of PrO_{2-x} or TbO_{2-x} with CeO_{2-x} for a working electrode of a solid state device (p. 1, ll. 54-58). However, said mixtures of materials would not read on the defined ceria solid solution doped with a mixed valency element. References such as Shuk et al (Solid State Ionics 116 (1999) pp. 217-223) (Chemistry of Materials, 1999, 11, pp. 473-479) teach the use of doped ceria solid solutions. However, none of these teachings give any motivation or suggestion of their utility in working electrodes of solid state devices. Claims 24-27 and 29 depend from allowable claim 23 and are thereby also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
